TRU-FRAME® LEGACY Sliding Screen Door Designed For Beauty, Built To Last !

Strongest Frame Available

With a heavy-duty extruded aluminum frame that measures a full 1" x 2 1/4" x .062", it simply outclasses the competition with its unusual strength. The Legacy patio sliding door was designed to withstand the test of time.

Touch Glide Rollers

Unique, spring-loaded precision steel ball-bearing wheel assemblies have the largest range of adjustment of any door today. Specifically designed to ease installation, they prevent the door from jumping the track while allowing for a touch glide.

Auto-Latch Handle System

An all-new Color-Coded Self-Latching handle ensures the door will close correctly every time, and the locking mechanism makes sure it stays that way. The flush handle set is recessed and doesn't project into the screen area—thereby enhancing your view and eliminating screen wear.

For salt air and harsh weather conditions, an all stainless-steel wheel and housing system is now available for the Legacy patio slider. Finally, wheels that last as long as the rest of the door's components.

The Last Screen Door You'll Ever Need.
